BOT: No Good Reasons for the Sell-off; Buy

BOT.ASX | BOTANIX PHARMACEUTICALS LIMITED | HEALTHCARE | BIOTECHNOLOGY

PRICE **A\$0.375/sh**

TARGET PRICE **A\$0.550/sh**

RECOMMENDATION

BUY

(UNCHANGED) (UNCHANGED)

Event

BOT's share price has softened over the past two weeks. Aside from broader macroeconomic factors, there are no good company-specific reasons which justify this share price movement.

In this analysis, we address potential concerns and outline why BOT represents a compelling buying opportunity at current prices.

Impact

Since releasing its 1H results last week, BOT's share price has come under pressure. Although a broader market risk-off has been evident in recent days – reflected in movements of key indices such as the S&P 500, Nasdaq Composite, and sector specific XBI S&P biotech index – the extent of BOT's decline remains puzzling.

The half year results came with no surprises, given this was a pre-launch period. Moreover, relevant financial metrics, such as cash movements and the ending cash balance, were already released in the January 4C quarterly update.

While some might have expected a comprehensive trading update on the Sofdra launch, which had occurred only a few weeks prior to the results, this expectation was likely unrealistic given the short period since the launch.

Furthermore, we foresee a limited impact to BOT from the recent news of the United States imposing a 25% tariff on Canadian exports. Although Sofdra is manufactured in Canada by contract manufacturer CPL, it is our understanding these tariffs will apply to the cost of goods sold, not the top-line Sofdra sale price, suggesting a negligible financial impact.

Overall, we remain confident in the opportunity present. The investment thesis is playing out as expected – the telemedicine platform is working, the sales team is deployed, key payer coverage is finalised, and early indicators show overwhelmingly positive feedback on Sofdra. We have discussed all of this in our recent research (see here).

Action

We maintain our Buy Recommendation and \$0.55 Price Target

The company is at a pivotal stage with the full commercial launch of Sofdra underway. Successful sales traction should see the stock re-rate, potentially above our price target.

Historically, comparable ASX-listed biotech companies have traded on circa 13.0x and 7.4x their two- and three-year forward revenues at launch. In contrast, BOT is trading at a ~53% discount to these averages (Figure 1 and 2). Further, applying these multiples to our forecasts would imply a ~\$0.77 share price.

Peer Trading Multiples

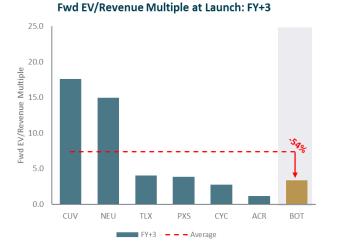

Considering the full commercial launch of Sofdra is \underway, we have explored what multiples the market has historically paid for companies at this stage.

The diagrams below (Figure 1 and 2) illustrate the forward enterprise to revenue multiple of several ASX-listed companies to have secured an FDA approval (specifically companies who secured approval on their first drug). These multiples are calculated based on forward consensus revenue at the date of commercial launch.

Figure 1: Forward EV/Revenue multiple at launch, based on consensus 2-years forward revenues

Figure 2: Forward EV/Revenue multiple at launch, based on consensus 3-years forward revenues

Source: Factset, EH analysis

Source: Factset, EH analysis

Acknowledging these businesses vary in different ways (business model, disease areas, existing licensing agreements, ex-US approvals, and product portfolios), indicatively the market has paid:

- 4.4x to 25.5x (13.0x average) 2-year forward consensus revenues; and
- 1.1x to 17.6x (7.4x average) 3-year forward consensus revenues

In contrast, BOT is trading at a \sim 53% discount to these average multiples. Applying these average multiples to our forecasts would imply an \sim \$0.77 share price.

Forecasts

Our Sofdra forecasts are shown below (Figure 3).
