Event

BOT has successfully resubmitted the FDA New Drug Application (NDA) for Sofdra (Sofpironium Bromide) ahead of schedule (originally planned for 1Q CY24).

Anticipated FDA approval has been brought forward to late 2Q CY24.

Impact

The FDA now has 30 days to confirm that BOT's resubmission constitutes a "Complete Response" to its letter, initiating the NDA review period.

Notably, the FDA will also clarify whether the review is a:

- Class 1 6 month review (expected); or
- Class 2 2 month review (less expected)

BOT is expecting a Class 1, 6-month review, implying FDA approval late 2Q CY24.

The resubmission follows the successful human factors (HF) validation study, in which all participants successfully prepared and correctly applied Sofdra gel to their armpits in accordance with the revised instructions for use (IFU).

In parallel, commercial preparations for launch are underway, with the company targeting a launch shortly after approval.

BOT is focused on engaging US payers (insurers) around contracting and pricing, preparing patient and physician-focused launch marketing and sales materials, testing telemedicine and supply chain elements, and finalising sales strategies.

Action

We maintain our Speculative Buy recommendation and \$0.30/sh Price Target.

The earlier than expected FDA NDA resubmission is highly encouraging, indicative of management under promising and over delivering.

We continue to see a solid buying opportunity following the Complete Response Letter (CRL) received in September.

As a reminder, the CRL solely pertained to patient instructions (specifically the instructions paper and product carton wording) — a minor issue in the broader context.

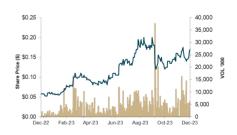

Compared to other ASX-listed cases of CRL's, BOT's appears to be the lowest risk and most manageable. Moreover, the same examples indicate most CRLs eventually secure approval, with precedent of a re-rate following refiling and into approval.

Catalysts

- NDA Confirmation within 30 days
- FDA Approval late 2Q CY24
